STONESTREET ONE ANNOUNCES NEW WIRELESS USB HOST SOFTWARE

UltraSuite® Windows Drivers For WHCI Hardware, Silicon Now Available

USB-IF Developers Conference, Amsterdam (October 1, 2007) – Stonestreet One, Inc., the leader in WiMedia-based ultrawideband (UWB) and Wireless USB software solutions for PC and embedded systems, today announced the availability of its UltraSuite® Wireless Host Controller Interface (WHCI) Drivers for Microsoft Windows XP and Vista systems.

Stonestreet One's UltraSuite® software powers the industry's leading Wireless USB solutions for connecting USB devices, including media players, digital cameras, camcorders, mobile handsets and other content-rich platforms. By adding these new drivers for WHCI silicon and hardware to its existing Ultrasuite product offerings, Stonestreet One is extending the capabilities and integration of UWB hardware platforms into a variety of products and platforms.

Jeff Ravencraft, USB-IF president, remarked, "Stonestreet One continues to complement and enhance the availability of certified solutions for the Wireless USB vendor community. These WHCI drivers enhance the list of software solutions available for PC and aftermarket OEM and ODMs to incorporate wireless USB capabilities into their hardware platforms."

David G. Brenner, vice president of marketing and business development for Stonestreet One, added, "With the further addition of WHCI drivers to our Ultrasuite portfolio, we are extending the availability of Certified Wireless USB solutions for the industry. We have tremendous demand for our UltraSuite offerings for both aftermarket and embedded systems including Wireless USB hardware that connects via a WHCI host interface."

UltraSuite is Stonestreet One's portfolio of software drivers and MAC software that enable WiMedia-based wireless solutions, including support for Certified Wireless USB, WiMedia Link Layer Protocol (WLP), and Bluetooth. UltraSuite supports a variety of systems from PC's to embedded devices, cell phones, peripherals, and consumer electronics equipment.

The UltraSuite WHCI Windows drivers are available to Stonestreet One customers under a software license agreement.

About Stonestreet One

Stonestreet One is a leading provider of wireless communications software products including UWB, Bluetooth, WiFi, and related technologies. The company's WiCenter® wireless management application, WiMedia ultrawideband stack, UltraSuite™, and Bluetooth protocol stack, Bluetopia®, are promoted and used by leading chipmakers, distributors, embedded software companies, and OEMs around the world in computing, automotive, biomedical, mobile communications and consumer electronics products. The company is an active contributing member of the USB Implementers Forum, the WiMedia Alliance, and the Bluetooth SIG. Stonestreet One is headquartered at 322 West Main Street, Louisville, Kentucky 40202, USA.
