Summary:

Correct Usage Collision

Background:

HUTRR68 defines Generic Desktop Usage 0x0A for Assistive Controls with a HUTRR33 allocation for a Water Cooling Device CA. This request deprecates HUTRR68 for new development in favor of a new usage.

Proposal:

Replace HUTRR68 Proposal section with the following text:

Changes are in the "4. Generic Desktop Page (0x01)"

New usage to be added to Table 6: Generic Desktop Page.

10*	Assistive Control	CA	4.1
11-2F	Reserved		

*Note, this was previously assigned 0A, however this collides with Water Cooling Device CA. New development shall use this value.

Additions referenced by the above usages:
Section 4.1 Application Usages

Assistive Control
assistive control

input control to

CA - A manual control or cursor device. An

device may consist of buttons or a pointing

communicate.

Response:
